

Chips disposal plant: TTS 600 with swarf mill and cooling lubricant cleaning

The firm elias engineering is situated in Niedereschach, Germany, since 1998.

We construct, produce and deliver machines and installations specially for the lathe-manufacturing industry. With the know how acquired in this field since 1986 we are at our customers disposal with a solid knowledge and an extensive practice of experience.

We deliver individual machines as well as complete solutions for our customers beginning with the separation of turned parts or chips directly at the production machine to the inner firm transport and to the disposal of the deoiling chips to containers.

Because of our experienced flexible unit construction system we solve each demand of our customers to optimum conditions.

For further informations or documents please contact our homepage "Kontakt" and send us an email. We try to answer as soon as possible.
